common sense in environmental management examines common sense not in theory but in practice jonathan woolley argues that common sense as a concept is rooted in english experiences of landscape and land management and examines it ethnographically unveiling common sense as key to understanding how british nature and public life are transforming in the present day common sense encourages english people to tacitly assume that the management of land and other resources should organically converge on a consensus that yields self evident practical results furthermore the english then tend to assume that their own position reflects that consensus other stakeholders are not seen as having legitimate but distinct expertise and interests but are rather viewed as being stupid and or immoral for ignoring self evident pragmatic truths compromise is therefore less likely and land management practices become entrenched and resistant to innovation and improvement through a detailed ethnographic study of the norfolk broads this book explores how environmental policy and land management in rural areas could be more effective if a truly common sense was restored in the way we manage our shared environment using academic and lay deployments of common sense as a route into the political economy of rural environments this book will be of great interest to scholars and students of socio cultural anthropology sociology human geography cultural studies social history and the environmental humanities

the management of the environment whether locally nationally or globally is of crucial economic social and scientific importance the first reader published for this course environmental management is one of the most common career paths for environmental studies science and geography graduates the courses attract large numbers in senior level third year and at graduate ma msc level offers a guide to further reading

adaptive management is the recommended means for continuing ecosystem management and use of natural resources especially in the context of integrated natural resource management conceptually adaptive management is simply learning from past

management actions to improve future planning and management however adaptive management has proved difficult to achieve in practice with a view to facilitating better practice this new book presents lessons learned from case studies to provide managers with ready access to relevant information cases are drawn from a number of disciplinary fields including management of protected areas watersheds and farms rivers forests biodiversity and pests examples from australia new zealand the usa canada the uk and europe are presented at a variety of scales from individual farms through regional projects to state wide planning while the book is designed primarily for practitioners and policy advisors in the fields of environmental and natural resource management it will also provide a valuable reference for students and researchers with interests in environmental natural resource and conservation management

environmental professionals are and will continue to be under increased pressure to become more knowledgeable of environmental management issues basic concepts in environmental management fulfills the long standing need for fundamental knowledge especially concerning government regulations on environmental and natural resource protection as a leading environmental professional and consultant since the 1940s kenneth m mackenthun offers a unique perspective on the breadth scope and ever constant change in environmental legislation at the federal state and local levels and what those guidelines signify for industry and citizens alike by maintaining an awareness of existing and forthcoming laws environmentalists can substantially enhance their career potential and be in a better position to protect the land air and sea the starting point for that knowledge basic concepts in environmental management

the aim of this volume is to provide a coherent set of chapters that address major issues in resource and environmental management the book has a north american focus with significant but not exclusive canadian content integration is the organizing theme of the volume integration as a concept meaning variously integration across disciplines across agencies and across sectors has been a key theme in the policy and management rhetoric of virtually every agency in north america and abroad for more than 30 years as one of the dominant themes of the discipline integration has been addressed both as a component and as the main focus of a variety of texts for this course however there is nothing on the market at the moment that is both up to date and north american in approach

volume 2 compartments stressors and sectors deals with the problems that occur in the three compartments of the environment namely air water and soil the contributors also address the socio economic sectors of industry traffic energy agriculture and tourism
